

ERIC JOHN A. PEÑA

+63 947 430 0125 | eric.john.pena@gmail.com | github.com/EricJohnPena | <https://ericjohnpena.github.io/portfolio/> | Cavite, Philippines

TECHNICAL SKILLS

- **Programming Languages:** Java, C#, JavaScript, Python, PHP
- **Frameworks & Technologies:** Spring Boot, Spring Data JPA, Hibernate, REST APIs, Thymeleaf, Tailwind CSS, TypeScript, JavaFX, Bootstrap
- **Databases:** PostgreSQL, MySQL, SQLite, SQL
- **Tools & Platforms:** Git, Docker, Postman, GitHub, Railway, Maven, Unity Engine
- **Operating Systems:** Linux, Windows

EXPERIENCE

- IT Helpdesk and Support Intern

July 2025 – September 2025

SP Madrid and Associates

 - Diagnosed and resolved hardware and software issues for end users.
 - Assisted with workstation deployment and system configuration.
 - Automated QR code generation and inventory tracking, improving operational efficiency.
 - Documented technical procedures and troubleshooting steps.
 - Collaborated with team members to resolve support requests within expected timelines.

PROJECTS

- Ledge-it—Enterprise Banking Management System

May 2026

(Java, Spring Boot, Spring Data JPA, Hibernate, PostgreSQL, Thymeleaf)

 - Developed and deployed a full-stack banking application, implementing secure authentication, account management, deposits, withdrawals, fund transfers, and transaction history.
 - Designed RESTful APIs and MVC-based backend services with Git version control, then deployed the application on Railway with a cloud-hosted PostgreSQL database.
 - <https://github.com/EricJohnPena/banking-app-web>
- Linux Homelab & Self-Hosted Infrastructure

May 2025

 - Designed and maintained a Linux-based Ubuntu homelab, deploying self-hosted services with Docker (Jellyfin, Nextcloud, Samba, Navidrome, Uptime Kuma, and Tailscale) while configuring SSH, port forwarding, reverse proxy, and secure remote access.
 - Performed system monitoring, troubleshooting, backups, and task automation using Linux command-line tools and scripting, strengthening hands-on experience in Linux administration, networking, containerization, and infrastructure management.
- LEXIA—Educational Vocabulary Learning Application (Thesis)

June 2025

(C#, HTML, CSS, JavaScript, PHP, MySQL)

 - Developed an educational mobile application for elementary students.
 - Implemented personalized learning features using machine learning concepts and Random Forest classification.
 - <https://github.com/EricJohnPena/Lexia-UI>

CERTIFICATIONS

- Programming (Java) NCIII – TESDA - CIICC

April 2026
- AWS Cloud Quest: Cloud Practitioner – Training Badge

May 2026
- Networking Basics – Cisco Networking Academy

September 2025

EDUCATION

- BS Computer Science – Cavite State University - Naic Campus

April 2026
